## WHO WE ARE?

Established in 1991 in Faridabad, Haryana, BST Machines Inc has grown into a prominent manufacturer and exporter of high-performance machinery for PVC pipe processing. With a diverse portfolio that includes Twin Screw Extrusion Plants, Slotting Machines, Threading Systems, Pulverizers, Mixers, and Scrap Grinders, BST serves both domestic and international markets across Bangladesh, Dubai, Tanzania, Ethiopia, Kenya, and parts of Africa.

Guided by the vision of Mr. Amarpreet Singh, the company has built a reputation for excellence over the past 35+ years. BST specializes in designing and producing fully automatic machines for pipe slotting, threading, and perforation—tailored to meet the unique requirements of each client. From concept to commissioning, BST collaborates closely with customers to deliver custom-engineered solutions backed by reliable maintenance support. This commitment to precision, innovation, and customer satisfaction has made BST a trusted name in the PVC pipe machinery industry.

## **Global Impact, Precision-Crafted**

“We manufacture world-class machines trusted by industries across continents.”

“Exporting excellence: Our high-performance units serve customers in over many countries.”

“Precision. Performance. Proven. Our machines are engineered for global success.”

## **Uncompromising Quality**

“Built to last, designed to lead—our machines embody premium quality and reliability.”

“Every unit reflects our commitment to engineering perfection and top-tier durability.”

## **Customer-Centric Innovation**

“Supported 24/7, powered by innovation—our customers are never alone.”

“Our expert team blends deep technical skill with fresh ideas to drive smart solutions.”

## **Beyond Borders**

“From Faridabad to the world—your machinery partner across continents.”

“International standards, local roots—we bring Indian precision to the global stage.”
